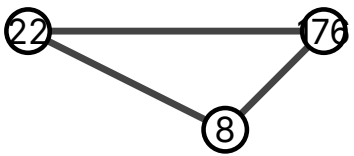
a K

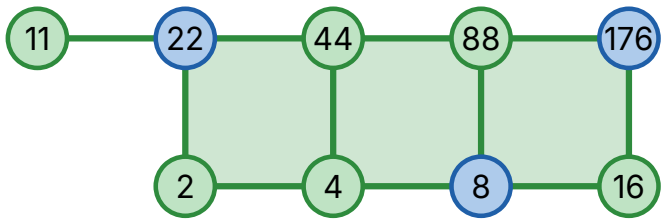


$\beta(K) = (1, 1)$
$r = (1, 0)$, $h = (0, 3)$

b $K^\circ = K \cap K'$ (3 points)

$\beta(K^\circ) = (3, 0)$
all 3 edges dead

c K'



$\beta(K') = (1)$
$r' = (1, 0)$, $h' = (0, 2)$

$\Delta\beta_1 = (h'_1 - h_1) + (r'_1 - r_1) + (r'_0 - r_0) = (2 - 3) + (0 - 0) + (1 - 1) = -1$. Maps $K \leftarrow K^\circ \rightarrow K'$ are inclusions.
