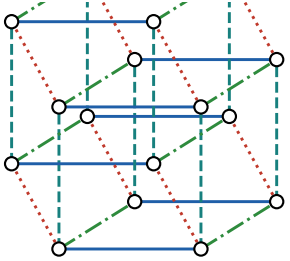
a 4-cube of commuting swaps (a projection)



edge style = which swap (s_1, …, s_4)

b finite-exact table

r	**1**	**2**	**3**	**4**
histories	4	100	3,601	194,864
swap classes	3	22	142	1,114
max cube dim.	1	2	4	5

finite-exact for 72^r, $r \le 4$.
Witness for $r = 3$, cube dim. 4:
$m_0 = 3$,
$w = (3, 1, 2, 1, 2, 1, 2, 1)$
swap positions [1, 3, 5, 7]
