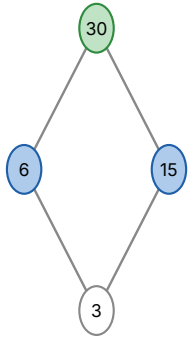
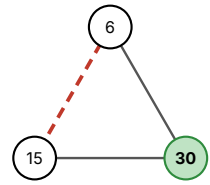
interval $[6, 15] = \{3, 6, 15, 30\}$



before: $D = \{6, 15\}$, $\beta = (1)$

after: $D \cup \{30\}$, $\beta = (1)$



the edge $6 - 15$ of $K(\{6, 15\})$ is pierced by the new occurrence $30 \in [6, 15]$ and is lost (dashed in the original position; Paper III Thm. A5T31, SIV-P6)
