levels of correspondence; arrow style = status
L1
numerical ratio
$C^3 = T_1 = 4x$ on the towers; $R(N) \in \mathbf{Z}$ iff $N = 1$; coincidences classified (Paper III R3T7)
L2
occurrence information
$D(x) \subseteq D(Cx)$ and ancestor translation on integers (SIV-P9c)
L3
event records: restricted
equal event records on the rigid domain and for listed pairs (Paper III B2T10, R3T7)
L3
event records: general
no general map between history and collective event records known (O3)
L4
geometric structures
integer endpoints: $K(D(t)) = K_{\mathrm{move}}(t)$ (B2T1); versus history complexes: obstructed (SIV-P5)
L5
intertwining: identity
$\Phi = \mathrm{id}$ excluded: $C(x)/x \le 2 < 4 \le T_N(x)/x$; snapshot $C^3 = T_1$ is no conjugacy
L5
intertwining: general
a non-identity Φ with $\Phi C = T\Phi$ is neither excluded nor constructed (O3)
