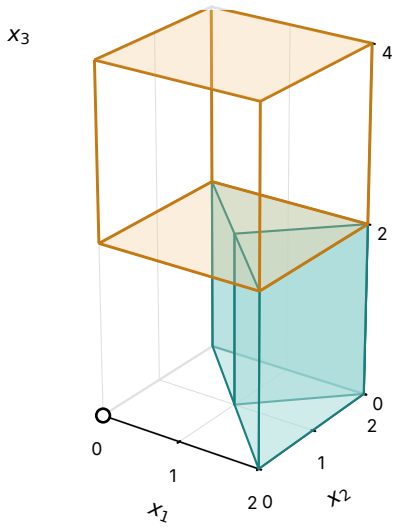
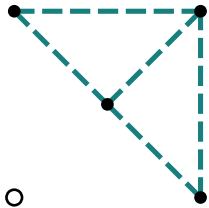
Split target $\Lambda' = E_2 \oplus 2\mathbf{Z}e_3$, $Q = (2, 2, 4)$ (exact planar complexes)

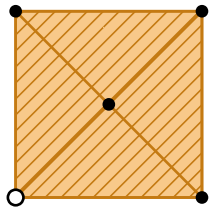
a $U(\Lambda', Q)$, $k = 2, J = 2$



b planar slices



$0 \le x_3 < k$:
$U(E_2, (2, 2))$
(origin excluded)



$k \le x_3 \le kJ$:
$U^0(E_2, (2, 2))$
(origin allowed)
